

WEB DEVELOPMENT PROJECTS

By Encryptix

INSTRUCTIONS

Update your LinkedIn profiles

For the Web Development internship, you will need to complete **at least 3 tasks** for successful completion of the internship.

Maintain a separate GitHub repository(name as **Encryptix**) for all the tasks and share the link of the GitHub repo in the task submission form(it will be given later through email).

You can refer to online resources such as Google Search and read tutorials. Watch videos(For Help).

SUBMISSION

A **TASK SUBMISSION FORM** will be shared later through email . Till then please continue your task.

A video need to be created to showcase your work, a demo of your effort.

For the Web Development internship, you will need to complete **at least 3 tasks for successful completion of the internship.**

The video can be hosted on LinkedIn for proof of your work and to build credibility among your peers.
You can tag @ENCRYPTIX in such posts.

Please add #encryptix in each of your task video postings on LinkedIn, Additionally, you can also add hashtags such as #internship #webdevelopment. for more reach and visibility

ABOUT THE INTERNSHIP

- Completion Certificate
- Placement Support
- Network Opportunity

WEB DEVELOPMENT

For the Web Development internship, you will need to complete at least 3 tasks for successful completion of the internship.

TASK 1

LANDING PAGE

A landing page is an ideal web development project for beginners. It requires basic knowledge of HTML and CSS. Through this project, you'll learn to create columns, divide sections, arrange items, and add headers and footers. The most important aspect is unleashing your creativity to design an impressive page. Pay attention to alignments, padding, color palette, boxes, and other elements. Be mindful of CSS to avoid overlapping elements. In short, a landing page project allows you to apply HTML and CSS skills, encouraging your creativity while ensuring a visually appealing and user-friendly design.

TASK 2

PORTFOLIO

Creating a personal portfolio using CSS and HTML is a popular beginner web development project.

Header Section: Add your name or a logo at the top. Optionally, include a brief introduction or tagline.

About Section: Insert an image of yourself. Write a short bio highlighting your skills and experience.

Skills Section: List your key skills or areas of expertise.

Projects Section: Showcase samples of your work or projects. Include project titles, descriptions, and images.

Resume Section: Provide a link to download your resume in PDF format.

Contact Section: Include your contact information, such as email address and phone number.

Footer: Add a copyright notice and any additional links or information

TASK 3

CALCULATOR

To create a basic calculator using CSS, HTML, and JavaScript, you'll need to implement an interactive interface with buttons for addition, subtraction, multiplication, and division operations. The calculator should have a display screen to show user input and results. Utilize CSS grid system for button alignments. Use event listeners, if-else statements, operators, and loops to handle user input and perform calculations. This project requires some skill but can be done with basic knowledge of these technologies..

TASK 4

TRIBUTE PAGE

With basic knowledge of HTML and CSS, you can create a webpage dedicated to someone you admire. Write about their admirable qualities, add images, and design a visually appealing layout. Experiment with font styles, use paragraphs effectively, and play with background colors. This project allows you to express your admiration in a simple and personalized way.

TASK 5

Job Board

Build a job board website where employers can post job openings and job seekers can search and apply for jobs. Use React, Node.js, and a database like MongoDB or PostgreSQL

Home Page: Welcome message and featured job listings.

Job Listings Page: List of job openings with essential details.

Job Detail Page: Detailed information about a specific job.

Employer Dashboard: Account management and job posting.

Candidate Dashboard: Profile management and job applications.

Job Application Process: Application form with resume upload. **Search Functionality:** Search bar for finding specific jobs.

Email Notifications: Notifications for successful applications and updates.

User Authentication and Security: Secure user login and data protection.

Mobile Responsiveness: Website works well on different devices.

Host the website at 000webhost, github.io, Netlify, heroku app or any other free hosting provider. Check in code in gitlab. (optional)

TASK 5

PROJECT MANAGEMENT TOOL:

Develop a project management tool that allows users to create projects, assign tasks, set deadlines, and track progress. Use React, Node.js, and a database like MongoDB or PostgreSQL.

Host the website at 000webhost, github.io, Netlify, heroku app or any other free hosting provider. Check in code in gitlab.

ASK US FOR HELP!

THE PURPOSE OF THIS INTERNSHIP IS TO LEARN AND GROW.

We have no desire to dictate to you. It is entirely up to you whether you seek guidance or not.

The given tasks may seem very easy or very difficult. We expect you to approach the tasks with professional diligence and give them the attention they deserve."
